Overview

A 3-day AgileDoc training course providing an introduction to the AgileDoc product suite. This course alternates between classroom instruction and hands-on configuration exercises led by experienced software engineers.

Students are guided through various examples and exercises that focus on common technologies used for AgileDoc report configuration. By the end of Day 3 users will have successfully configured an AgileDoc report from scratch!

Training Prerequisites

Trainees will access Informetric's training environment via Remote Desktop. Students are required to bring a laptop computer with Remote Desktop Connection enabled.

Course Location

The Informetric East Coast USA facility is located in New Providence, New Jersey, 25 miles west of New York City. Convenient train service offers direct access to downtown Manhattan.

New Providence, NJ

Interactive hands-on training

Classroom instruction by experienced Informetric software engineers

Structured curriculum with numerous working sessions

Gain expertise in automation system software lifecycle management

Review of Informetric Best Practices

Develop experience with the AgileDoc Interactive Layout and Expression Editor

Students have the opportunity to work with the AgileDoc Standard Template Library

Interaction with senior Informetric personnel

Training hosted in NYC suburb with commuter rail service to downtown Manhattan

Training is conducted in New Providence, NJ, a suburb of New York City with convenient highway, airport, and rail access.
