Overview

A 5 half-day training course introducing the InfoBatch product suite. Training is conducted for 5 consecutive days remotely, from 8am-12pm ET. This course alternates between classroom instruction and hands-on configuration exercises led by experienced software engineers.

Students are guided through various examples and exercises that focus on common technologies used for InfoBatch report configuration. By the end of Day 5 users will have successfully configured an InfoBatch report from scratch!

Training Prerequisites

Trainees will access Informetric's training environment via Remote Desktop. Students are required to have a laptop computer with Remote Desktop Connection enabled. Students will also be required to communicate with the instructors through Microsoft Teams and GoToMeeting.

Recommended

It is strongly recommended that trainees have access to a headset and dual monitors.

Virtual Course!

Interactive hands-on training

Revised content provides orientation for InfoBatch 4.0

Classroom instruction by experienced Informetric software engineers

Structured curriculum with numerous working sessions

Review of Informetric Best Practices

Gain experience with the InfoBatch Interactive Layout and Expression Editor

Students have the opportunity to work on relevant application examples

Interaction with senior Informetric personnel

Topic 1: InfoBatch Orientation and Data

Introduction to InfoBatch
InfoBatch Data
