Overview

A 3-day InfoBatch training course providing information on advanced configuration topics. This course alternates between classroom instruction and hands-on configuration exercises led by experienced software engineers.

Students are guided through various examples and exercises that review Advanced Items, Best Practices and higher-level configuration tasks such as AutoGen triggers.

Training Prerequisites

Students should have a basic knowledge of the following technologies: SQL, XML, HTML, CSS, XSLT & XPath. Trainees will access Informetric's training environment via Remote Desktop. Students are required to bring a laptop computer with Remote Desktop Connection enabled.

Course Location

The Informetric East Coast USA facility is located in New Providence, New Jersey, 25 miles west of New York City. Convenient train service offers direct access to downtown Manhattan.

New Providence, NJ

Interactive hands-on training

Revised content provides orientation for InfoBatch 4.1

Classroom instruction by experienced Informetric software engineers

Structured curriculum with numerous working sessions

Review of InfoBatch Advanced Items

Perform advanced configuration exercises

In-depth review of AutoGen

Students have the opportunity to work on relevant application examples

Interaction with senior Informetric personnel

Training hosted in NYC suburb with commuter rail service to downtown Manhattan

Training is conducted in New Providence, NJ, a suburb of New York City with convenient highway, airport, and rail access.

Day 1 – InfoBatch Review

InfoBatch Overview
- Architecture / Applications
- InfoBatch 4.1 Configurator

Technologies Review
- SQL
- XML
- HTML
- XSLT & XPath

Library Management
- Library Types
- Library Configuration Elements
- Versioning
- Import/Export Libraries

Day 2 – Library Configuration

Report Configuration Library
- Preconfigured Queries
- Expressions
- Replace Keys
- Resources

Hierarchy Query Library
- User Conditions
- External Triggers

Report Template Library

Day 3 – Best Practices, Troubleshooting & Report History

Library Management Best Practices
- Migration Strategy
- Change Management

Logging & Troubleshooting
- Common Issues
- AutoGen Architecture
- AutoGen Event Detection

Report History Configuration
- Common Applications

Please note: Informetric continually adjusts the agenda based upon attendee feedback. This agenda is subject to change.

InfoBatch Advanced Training

3-day InfoBatch Advanced Training course	
Two Informetric training instructors	
Training environment provided by Informetric	

Cost [1][2][3] $3,250 US

Prerequisites

Each participant is expected to bring a laptop computer
Laptop must meet the following requirements:
Windows laptop computer
Remote Desktop Connection enabled
Each trainee will access a training environment via Remote Desktop
