

Overview

A 5 half-day training course providing an introduction to the AgileDoc product suite. This course alternates between classroom instruction and hands-on configuration exercises led by experienced software engineers.

Students are guided through various examples and exercises that focus on common technologies used for AgileDoc report configuration. By the end of Day 5 users will have successfully configured an AgileDoc report from scratch!

Training Prerequisites

Trainees will access Informetric's training environment via Remote Desktop. Students are required to have a laptop computer with Remote Desktop enabled. Students will also be required to communicate with the instructors through Microsoft Teams and Webex.

Recommended

It is strongly recommended that trainees have access to a headset and dual monitors.

Virtual Course!

Interactive hands-on training

Classroom instruction by experienced Informetric software engineers

Structured curriculum with numerous working sessions

Review of Informetric Best Practices

Gain experience with the AgileDoc Interactive Layout and Expression Editor

Students have the opportunity to work on relevant application examples

Interaction with senior Informetric personnel

Day 1 – AgileDoc Orientation and Data

Introduction to AgileDoc
Architecture / Applications
 AgileDoc Configurator
 AgileDoc Web Server
 AgileDoc FHX Upload
FHX Upload Configuration
 Objects, Relationships
 Image Generation/Conversion
FHX Upload Exercise
